

A NEW PARADIGM SHIFT

IN PROTEIN NUTRITION

Nov. 25, 2013

3:30 p.m. Lecture
Reception to Follow

Kleberg Building
Room KLCT 127

Dr. Guoyao Wu

Distinguished Professor

Department of Animal Science
College of Agricultural and Life Sciences

*A NEW PARADIGM SHIFT
IN PROTEIN NUTRITION*

For decades, science categorized all amino acids as either essential or non-essential for humans and other animals.

Mounting evidence indicates all organisms need "non-essential" amino acids to grow, develop, reproduce, thrive and survive.

Dr. Wu, Sigma Xi's Outstanding Distinguished Scientist, will explain how this shift in thinking is revolutionizing the science of protein nutrition.
